# भारत सरकार पेयजल एवं स्वच्छता मंत्रालय Government of India Ministry of Drinking Water and Sanitation

**D.O. No. W-11039/3/2017-Water-I**Dated: 2<sup>nd</sup> February, 2017

Dear Madam/Sir,

You are aware that under the "National Rural Drinking Water Programme" (NRDWP) States/UTs will have to plan for each year taking into consideration the ongoing schemes, new schemes as well as schemes which will require augmentation and link to the habitations which are proposed to be covered through these schemes during that financial year. After the annual shelf of projects (DPRs) is finalized for the year 2017-18, it is to be cleared in the State Level Scheme Sanctioning Committee (SLSSC).

- 2. State Annual Action Plan for NRDWP for the year 2017-18 will have to be sent by 07/02/2017. Presentations and discussions at official level with Ministry of Drinking Water and Sanitation, Government of India in New Delhi will be held in February-March, 2017.
- 3. The Annual Action Plan 2017-18 may please be prepared as per format available at AAP format IMIS of the Ministry and enclosure I, keeping in mind the following:

#### A. Plan Size:

For AAP preparation purposes, the NRDWP allocation for 2017-18 may be taken as **equal to** the current year 2016-17 plus anticipated opening balance under different components on 1.4.2017. The estimated cost of schemes taken up may be **atleast two times** the quantum of available funds as instructed via DO Letter No G-11011/01/2011-Water dated 18<sup>th</sup> September, 2012 so that any glitches in implementation do not hinder the full utilisation of available funds. However the quantum of funds required for completing unfinished projects should be first taken into account. **The physical targets should be fixed based only on available funds for the financial year 2017-18**.

#### **B.** Issues

The State should provide response/action taken statements on the following:

- Identified Action Points of AAP discussions minutes of 2016-17.(Copy available on website)
- Issues /Problems (If any) in implementation during 2016-17.
- Issues regarding UCs and Audited Statement of Accounts.

#### C. Coverage & Quality Sub Plan

- i. Coverage & Quality Sub Plan has to be prepared for upto 67% of the planned Allocation added on Opening Balance as on 01.04.2017.
- ii. A separate 5% Water Quality Plan for Chemically contaminated habitations and JE/AES affected districts will have to be prepared as per Ministries letter W-11011/07/2012-WQ dated 17.07.2012.
- iii. As part of the approach in the 12<sup>th</sup> Five Year Plan period, while the ultimate goal is to provide households with safe piped drinking water supply at the rate of 70 lpcd, considering that 40 lpcd has been the norm over the last 40 years and there is still a large population uncovered with this level, as an interim measure the goal has been kept at 55 lpcd for the Twelfth Plan. By 2017, it is targeted that at least 50 per cent of rural population in the country (as against 35 per cent today) will have access to 55 lpcd within their

ग्रामीण क्षेत्रों में पेयजल स्थायित्व एवं सम्पूर्ण स्वच्छता

Sustainable Drinking Water and Sanitation for all HERLIPAFAreas

household premises or within 100 metres radius (and within 10 metres elevation in hilly areas) from their households without barriers of social or financial discrimination. Individual States can adopt higher quantity norms. As part of the 12<sup>th</sup> Five Year Plan targets, States have to focus on providing individual household piped water connection. By 2017, it is targeted that at least 35% of rural population have individual household water supply connections. Hence States should utilize NRDWP funds for designing of Piped Water Supply Schemes with 100% household connections to the maximum extent.

- **iv.** In view of the depleting groundwater levels, States are advised to take up more and more number of surface water based schemes in the interest of sustainability of service delivery and in preference to groundwater based schemes.
- Also as part of the approach in the 12<sup>th</sup> Five Year Plan, convergence between drinking water supply schemes under NRDWP and toilet construction and use under Swachh Bharat Mission (G) to saturate Gram Panchayats and make them open defecation free (ODF) by 2<sup>nd</sup> October, 2019 should be achieved. For the purpose of better convergence it is suggested that:
  - a) Gram Panchayats with 100% household toilet coverage as reported on Swachh Bharat Mission (G) website in your State the identified and priority should be given to provide PWS in these habitations.
  - b) Quality affected and partially covered habitations in these GPs may be taken up on priority for provision of piped water supply or other water supply schemes.

**Vi** Among the **ongoing** schemes it is reiterated here that the states are required to complete the schemes which are at advance stage of completion in the following order:

- a) 100 % physically completed but financially incomplete
- b) More than 75 % but less than 100 % physically complete
- c) More than 50 % but less than 75 % physically complete
- d) More than 25 % but less than 50 % physically complete
- e) While doing so, priorities is to be accorded by the states to the schemes meant for Arsenic / Fluoride affected habitation and Piped Water Supply Schemes for Sansad Adarsh Gram Yojana (SAGY) Gram Panchayats (GPs) / Verified Open Defecation Free (ODF) villages.
- f) For the schemes which are less than 25 % completed, state needs to complete them on their own budget.
- g) Rejuvenation and Modernization (R&M) of schemes that are close to the end of their design period.
- D. All remaining Government rural schools without drinking water supply and water supply to toilets should be covered at the earliest under NRDWP (Coverage) to comply with the orders of the Hon'ble Supreme Court of India if not yet complied.
- E. All remaining Anganwadis in Government/community/local body buildings in rural areas without water supply to be provided water supply facilities under NRDWP (Coverage) by 31st March, 2017.
- F. To ensure the assured availability of potable drinking water on sustainable basis in SC/ST concentrated habitations, the State/UTs are required to earmark at least 22% of the NRDWP funds for drinking water supply to the SC concentrated habitations and another minimum 10% for the ST concentrated habitations. In cases where, the States have achieved full coverage of SC/ST concentrated habitations, such States/UTs may be taken up augmentation schemes in the SC/ST habitations to raise service levels. Where the percentage of SC or ST population in a particular State or the existing coverage of SC/ST concentrated habitations warrants earmarking/ utilization of more than stipulated provisions, additional funds should also be utilized. The list of such SC and ST concentrated habitations is indicated in the MDWS website.

- **G.** Priority in coverage should also be given to minority concentrated habitations in the 116 minority-concentrated districts identified by the Ministry of Minority Wairs, Government of India which are indicated in the MDWS website.
- H. The 88 Districts covered under Integrated Action Plan (affected by Left Wing Extremism) and with predominant tribal population as per the Government of India list which is also available in MDWS website should be given higher per capita allocation and release of funds.

#### I. Sustainability Sub-Plan

Sustainability Sub-Plan for upto 10% of the planned sliocation should be prepared for over-exploited, critical and semi-critical blocks and for blocks with depleting groundwater levels. These plans should be prepared on watershed basis in which appropriate groundwater recharge and water harvesting structures are located using Groundwater Prospects (HGM) maps, GIS and with technical guidance of CGWB, NRSC/State Remote Sensing Centers and Etate Groundwater Boards/ Departments. Labour component of the works may be converged with MNRE35.

#### J. O&M Sub- Plan

**O&M Sub-Plan for 15%** of the allocation should give details of amounts to be transferred to Panchayats and amounts to be spent on various heads by the PHED. State governments are requested to dovetail the funds under TFC, SFC, BRGF etc. to make the system sustainable.

### · K. Support Activities Sub- Plan

- Support Activities Sub-Plan for 5% of the allocation comprising HRD, IEC, Community involvement including incentive to ASHA workers @ Rs 75 per household connection, WSSO, DWSM, BRC, MIS, Computerisation, Monitoring & Evaluation, Research and Development has to be prepared.
- Activity plan for involving community in planning, monitoring and O&M of schemes including VWSC/ Pani Samiti formation/ activation, awareness generation and training activities has to be prepared.
- Water Quality Monitoring and Surveillance Plan for 3% of allocation giving the numbers of grass root level workers (glws) to be trained (i.e. remaining glws @ 5 per GP and refresher training), FTKs to be distributed @ 1 per GP (more in case of large GPs), State/district and subdistrict labs to be set up/upgraded, samples to be tested (about 3000 per annum in district, subdistrict labs). All sources to be tested at least once a year for chemical and twice for bacteriological contamination.

#### L. <u>Incentive Fund:</u>

10% of the NRDWP allocation at the Central level is allocated to State based on rural population managing drinking water schemes. From 2011-12 the "Management Devolution Index" is being used along with the rural population managing drinking water schemes for allocating the Incentive Fund. The incentive funds should be exclusively utilized for coverage of "Quality Affected Habitations". In case, the quality affected habitations are not available then priority should be given as per para vi.

#### M. Convergence

- i. Gram Panchayats with 100% Toilet coverage in all habitations should be taken up on priority for coverage with piped drinking water supply schemes or other water supply schemes to raise them to 100% water supply coverage status also.
- Waste water management plan to be prepared giving numbers and estimated cost of low cost waste water management structures to be taken up by convergence with MNREGS/ SBM (G) etc. in habitations to be served by PWSS.
- **iii.** Sustainability Plan showing sourcing of funds from other schemes like MNREGS, Watershed programmes may be prepared.
- iv. O&M Plan showing sources of funds for O&M of rural drinking water supply systems to be prepared.

4. The Action Plan 2017-18 will have to be prepared in the AAP format available at IMIS of the Ministry with 7 formats for districts and for the States. The District Plans should be uploaded along with the State Summary Plan on or before **07.02.2017** on IMIS. The soft copies of the format will be available for data entry from **03.02.2017**.

All targets of habitations to be covered and sustainability structures with locations should be marked on IMIS before plan discussions. It may please be noted that first installment of NRDWP funds would be released only after marking of targets on IMIS as per plan discussions. The above should be submitted on or before 7<sup>th</sup> February, 2016 in hard and soft copies and entered on the Ministry's website.

#### 5. State AAP Presentations:

Presentations should include

- Response/Action taken by State on action points identified in 2016-17 AAP discussion;
- Action taken on Issues in 2016-17;
- Issues regarding UCs and ASAs;
- Physical performance against targets for 2016-17;
- Financial performance in overall and in SC, ST concentrated habitations and in minority concentrated and LWE districts;
- Performance against targets as given in the templates;
- Updation of annual and monthly data on IMIS;
- Details of incomplete works sanctioned in 2016-17 and earlier;
- Good and Innovative practices adopted;
- Details of AAP 2017-18 with sub-plans.

Regards,

Schedule of presentations to be made by States/UTs enclosed and states required to adhere to this schedule approved by Secretary (DWS).

With

Yours Sincerely,

[ SATYABRATA SAHU ]

To,

Pr. Secretary/Secretary in Charge of Rural Drinking Water Supply in the States/UTs
