D.O NO: WQ-11018/7/2015-O/o DIRECTOR (Stat)  
Dated 10<sup>TH</sup> March 2016

Dear Sir / Madam,

Subject: Launching of National Rural Drinking Water and Sanitation Awareness Week"  
from 16th March to 22nd March 2016.

In view of low awareness in villages across India on issues pertaining to the Rural drinking Water and Sanitation like building and use of toilet ,safe disposal of child faeces, safe handling of water, use of water only from safe sources in chemically contaminated (arsenic/fluoride /iron affected etc. )habitations, use of drinking water from bacterially contaminated sources only after treatment , water security ,water conservation, participatory O & M of water supply system etc. ,it has been decided in this Ministry to launch a" National WASH Awareness Week" across all states of India from 16<sup>th</sup> march 2016 to 22<sup>nd</sup> march 2016.

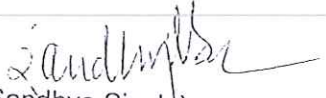

In the context of the proposed country wide week long campaign , beside generating general mass awareness by utilizing "mass media"(Radio ,TV ,Newspapers ", "new media"(Bulk Voice SMS),Reminder Media(Bus Panel, Hoardings ,Wall Paintings ,Kiosks ,Posters etc.), maximum emphasis should be given on campaigning in each habitation and motivating each and every household, by utilizing the services of PRI , Block Coordinators, Clusters Coordinators of BRCs, grass root level workers (ASHA, Anganwadi workers, Swachhata Doot ,SHGs ,Members of VWSC etc..)In each village separate ward-wise teams may be built up by involving Ward Members, ASHA, Anaganwadi workers, SHG members, Swachhata Doot, natural leaders, religious leaders, school teachers etc.) and the teams should arrange series of group meeting in each ward and visit each and every household repeatedly during this week to make them aware about best practices of Sanitation and personal hygiene & drinking water.

Before the launch of the campaign , all the water sources(community & private) should be invariably be tested& result communicated and all chemically contaminated source should be painted RED and safe sources painted GREEN and appropriate messages should be displayed near chemically contaminated sources discouraging the use of water from such sources for drinking purpose. In habitation where all the sources are contaminated and water supply from safe surfaces is not available "social marketing" of appropriate filters may be planned and executed, with adequate supply e-up, higher motivation and creation of demand. In the GP's where toilet construction demand is poor, there camps should be organized and people should be communicated about the usefulness of the use of toilets. They should also be sanctioned toilets in the camps.

For any further clarification or help the under signed may be contacted at e Mail:  
sandhya.singh@nic.in.

All the states are requested to kindly identify a Nodal Officer for this campaign and intimate the name and contact number and e-mail address for future correspondence on this matter. A brief "Suggested Action Points for National WASH Awareness Week" is being attached may be customized according to the requirement of each area.

Regards,

  
(Sandhya Singh)

To,

Principal Secretary / Secretary Incharge of Rural Sanitation and Drinking Water in all the States.
