Subject: Consultation Workshop to finalise training modules for ground water management training in the National Rural Drinking Water Security Pilot Projects

Dear Sir,

As you are aware, the National Rural Drinking Water Security Pilot Project is being implemented in 15 Blocks across 10 States under the NRDWP. Implementation of this Project is being monitored periodically through reports and national level review meetings.

In order to strengthen our efforts in building capacities at the village level for effective ground water management, the WSP-South Asia had hired an International firm, M/s MetaMeta to design and implement a Ground Water Management Training Program in all the 15 Pilot Blocks. This firm has in its team both international and national subject experts. M/s MetaMeta conducted a Training Needs Assessment (TNA) study in the Pilot Blocks, and used it to identify training needs, based on which a comprehensive training module will be prepared in local languages.

A two day consultation workshop is being conducted on 22-23rd July 2014 by the WSP-South Asia, The World Bank, with the MetaMeta and the State officials, for having a detailed presentation and discussion on various aspects of the training module that has to be developed. For this, two participants from each Pilot Block are suggested to attend this workshop.

The participants would include:

District Nodal Officer

Team Leader-Support Organisation
